## 8 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The *Regional Freshwater Plan for Taranaki* generally supports taking surface water if at least 2/3 of habitat at MALF is retained and particular regard is had for specific matters such as ecological and amenity values, existing and future needs and the relationship of Tangata Whenua with the water body.

- I will adopt the RMA assessment above; or
- I will attach an alternative assessment

## 8 Assessment of Environmental Effects

An assessment of environmental effects [AEE] in accordance with schedule 4 of the Resource Management Act 1991 must be provided with the application. The AEE detail must correspond to the scale of the effects that the activity may have on the environment.

Completing the AEE section of this form will be adequate for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.

Schedule 4 can be viewed at [www.trc.govt.nz/resource-consent-application-forms](http://www.trc.govt.nz/resource-consent-application-forms)

8.1 Consideration of alternative methods of discharge, including discharging to another receiving environment.

- A)  No alternatives considered. This is the only feasible option. Explain below if appropriate; or
- B)  Provide a description of alternatives considered and the reasons for the option chosen

Refer to AEE

OR

- New Consent/No monitoring data

8.3 Provide an assessment of the effects on the environment, including with particular reference to:

- the contaminants identified in Question 5.6
- any effects on soil
- any effects on groundwater
- any likely change in the colour or clarity of receiving water
- distance away that any effects are likely to be noticeable
- any erosion/scour effect of the discharge
- any effects on ecology, amenity or maori cultural values

Also identify any coastal features in the vicinity: archaeological sites of significance, surf breaks, significant surfing areas, sites of significance to Maori, reefs, marine reserves and marine protected areas. Their locations are shown at:

<https://maps.trc.govt.nz/LocalMapsViewer/?map=14083dae18734b83a3a7a0fc51b34283>

Specifically consider the environmental effects on these features.

## 9 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The Regional Freshwater Plan for Taranaki generally supports discharges to water or land if adverse effects such as those associated reduced water quality are avoided, remedied or mitigated. These requirements can be met by appropriate treatment and/or adopting the best practicable option to minimise effects.

I will adopt the RMA assessment above; or

I will attach an alternative assessment

## 9 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

The Regional Freshwater Plan for Taranaki generally supports discharges to water or land if adverse effects such as those associated reduced water quality are avoided, remedied or mitigated. These requirements can be met by appropriate treatment and/or adopting the best practicable option to minimise effects.

## 8 Assessment of Environmental Effects

An assessment of environmental effects [AEE] in accordance with schedule 4 of the Resource Management Act 1991 must be provided with the application. The AEE detail must correspond to the scale of the effects that the activity may have on the environment.

Completing the AEE section of this form will be adequate for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.

Schedule 4 can be viewed at [www.trc.govt.nz/resource-consent-application-forms](http://www.trc.govt.nz/resource-consent-application-forms)

8.1 Consideration of alternative methods of discharge, including discharging to another receiving environment.

- A)  No alternatives considered. This is the only feasible option. Explain below if appropriate; or
- B)  Provide a description of alternatives considered and the reasons for the option chosen

No alternative in relation to discharges - primary approach is to maximise discharge to land over discharge to water & that is continuing to land owned by applicant.

~~Alternatives to land~~

8.2 If the application is to renew a consent, summarise the monitoring that has been undertaken and the environmental effects as identified by that monitoring.

Rev & PDP report (2018)

OR

- New Consent/No monitoring data

8.3 Provide an assessment of the effects on the environment, including with particular reference to:

- the contaminants identified in Question 5.6
- any effects on soil
- any effects on groundwater
- any likely change in the colour or clarity of receiving water
- distance away that any effects are likely to be noticeable
- any erosion/scour effect of the discharge
- any effects on ecology, amenity or maori cultural values

Also identify any coastal features in the vicinity: archaeological sites of significance, surf breaks, significant surfing areas, sites of significance to Maori, reefs, marine reserves and marine protected areas. Their locations are shown at:

<https://maps.trc.govt.nz/LocalMapView/?map=14083dae18734b83a3a7a0fc51b34283>

Specifically consider the environmental effects on these features.

## 9 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The Regional Freshwater Plan for Taranaki generally supports discharges to water or land if adverse effects such as those associated reduced water quality are avoided, remedied or mitigated. These requirements can be met by appropriate treatment and/or adopting the best practicable option to minimise effects.

- I will adopt the RMA assessment above; or
- I will attach an alternative assessment

16.3 Invoicing details: (where to send the invoice for this consent application)

Applicant  or Consultant

16.4 Is the Council required to quote a purchase order number on future invoices for this application?

Yes  Order Number:   
No

The deposit amount is required when an application is submitted and is an **initial deposit** towards the final cost of processing the application. Processing of the application will begin when the deposit is received. Purchase orders are not acceptable as payment for the deposit and we are unable to issue you an invoice/receipt until payment has been received. The final cost of processing is based on actual and reasonable staff time and disbursements spent processing the application. The final cost (less the deposit) is invoiced at the end of the application process, but there may also be interim invoices during the process.

Where there is more than one application required for the same proposal, an initial deposit is required for each application (non notified applications).

If the consent is notified, a larger deposit will be required. We will advise if the application is to be notified.

Withdrawn applications will incur the cost for work done up to the date of withdrawal.

Applications returned due to inadequate information will incur the cost of work done in receiving the application, assessing the information and returning the application.

All collection costs incurred in the recovery of a debt will be added to the invoice amount due. Overdue invoices will incur an interest charge of 12% per annum.

Details of Council's charging policy are in its 2015/2025 Long-Term Plan.

Completing the AEE section of this form will be adequate for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.

## 9 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The Regional Freshwater Plan for Taranaki generally supports discharges to water or land if adverse effects such as those associated reduced water quality are avoided, remedied or mitigated. These requirements can be met by appropriate treatment and/or adopting the best practicable option to minimise effects.

- I will adopt the RMA assessment above; or
- I will attach an alternative assessment

## 8 Assessment of Environmental Effects

An assessment of environmental effects [AEE] in accordance with schedule 4 of the Resource Management Act 1991 must be provided with the application. The AEE detail must correspond to the scale of the effects that the activity may have on the environment.

Completing the AEE section of this form will be adequate for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.

Schedule 4 can be viewed at [www.trc.govt.nz/resource-consent-application-forms](http://www.trc.govt.nz/resource-consent-application-forms)

8.1 Consideration of alternative methods of discharge, including discharging to another receiving environment.

## 9 Assessment of Part 2 Matters and Policy

An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.

For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The Regional Freshwater Plan for Taranaki generally supports discharges to water or land if adverse effects such as those associated reduced water quality are avoided, remedied or mitigated. These requirements can be met by appropriate treatment and/or adopting the best practicable option to minimise effects.

- I will adopt the RMA assessment above; or
- I will attach an alternative assessment
