## Submission details

Please provide details of your submission. If your submission is in a document, you can upload the document below.

The New Plymouth District Council (NPDC) support the provision of facilities that enable organic waste to be processed for beneficial reuse, rather than disposal to landfill. This is consistent with both the Taranaki Waste Management and Minimisation Strategy and also NPDC's Waste Management and Minimisation Plan, both of which identify organic wastes as a priority and where alternatives to landfill should be made available where feasible.

The Uruti Composting Facility operated by Remediation (NZ) Ltd provides a local regional disposal option for organic wastes. With the eminent closure of the regional landfill at Colson Road, and the need to transport waste outside the region for landfill disposal, the provision of local alternative solutions for organic waste processing at Uruti continues to be important disposal solution for a number of organic waste streams. As long as environmental effects of the operation can be managed and minimised, NPDC supports the granting of resource consents that will enable this facility to continue operating.
