

## Appendix VII: Threatened species in Taranaki

A number of threatened species in Taranaki have had their threat status change from the classification undertaken in 2002 to 2005: ornate skink status changed from not threatened to gradual decline; goldstripe gecko from sparse to gradual decline; NI rifleman from not threatened to gradual decline. Threat classification and qualifiers can be checked against the 2005 lists (Hitchmough et al. 2007).
