

# Let's look at some specific scenarios

Click on the six scenarios below to learn more about how the groundwater system works.

**1** Where does rain go when it falls on the ground?

**2** How does groundwater interact with streams and rivers?

**3** How does groundwater interact with rocks and sediments?

**4** How do other liquids move through the groundwater system?

**5** What happens when we take groundwater from a bore or well?

**6** What about extracting water from a confined aquifer?

 **Glossary**
